GRN Consulting is mandated with technical due diligence for 4 properties in Leipzig

GRN Consulting, Berlin, has been mandated by Allianz Immobilien GmbH, Stuttgart/Berlin, with the technical due diligence for 4 office and administration buildings. For successful preparation of the property sale, GRN Consulting identified all defect sources and risks in the building substance, the space programme, maintenance and former waste deposits requiring rectification, by means of a differentiated form of building technology survey for nearly 70,000 m² GFA, in advance of the transaction decision, and provided the future investor with the necessary security in the market value appraisal of the properties.
